Academic Standards Committee - Full Committee

Meeting Minutes - April 25, 2019

Attendees: Rick Swee, Kam Todd, Jeanne Hamer, Alex Brehm, David McCarthy, David Rosi, Mary Leach, Sue Orchard

Guest: Tamra Bell

Discussion held about the new Computer Science requirement and the committee agreed to allow the new course changes to be approved when petitions come through so that the committee does not have to review.

Committee discussed an issue around a student who wanted to graduate under a 79-81' catalog to help with their teaching degree. The Academic Standards Committee was the most straight forward approach for the student v. having the student going through CPLA for 45 credits. The student's graduation date and transcript would be backdated. The automotive faculty were okay with the petition.

Committee discussed having independent studies and how rigorous they are v. being credits needed to qualify for assistance. These elective credits are no longer allowed in a program unless the credits are relevant for the degree path.

Seven other student petitions were reviewed and discussed by the committee.

Meeting adjourned.
