I. Old business:

a. Follow up on past convo about spring trainings

- Doing awareness campaign about safety, focus on people of color
- Replace RAD discussions with some sort of discussion time.

b. How is the population doing with the changes?

- Are faculty being flexible?
- Are we being flexible with faculty and staff?
- How can we identify students who need support?

Can we share stories for students who are struggling and how they are doing it? This would give an example to faculty of what people are doing to try to work from home and deal with this situation.

Should we create a document for reporting different inequities resources

Could we tell students how the classes are going to be held
